ADD	F-PAS-10640		B	The EOC shall generate the command submnemonic value for the CERES solar calibration set azimuth command and insert this value into a specified CERES solar calibration activity.	The command submnemonic value should be equal to the value of the CERES solar azimuth angle at the time when the CERES solar elevation angle is equal to -11 degrees. This information is available via lookup and interpolation of FDD solar azimuth/elevation angle predicts. The FOT must provide the CERES solar calibration command mnemonic, command submnemonic, and parameter number.	<u>functional</u>	<u>approved</u>	<u>demo</u>	<u>unverified</u>
